

WIRELESS DOOR LOCK CONTROL SYSTEM

PRECAUTION

1. NOTICES WHEN CHECKING

- (a) Wireless door LOCK / UNLOCK function:
This function operates only when the following 3 conditions are met.
- (1) No key is inserted into the ignition key cylinder.
 - (2) All the doors are closed.
 - (3) The power door lock control system operates normally.
- HINT:
- The UNLOCK function operates even when a door is open.
 - The UNLOCK function operates even when the key is in the ignition key cylinder. However, the ignition switch must be OFF.
- (b) Panic alarm function:
This function operates only when the following condition is met.
- (1) The ignition switch is OFF.
- HINT:
The key can be inserted, but the ignition switch must be OFF.
- (c) The wireless transmitter operational area differs depending on the situation.
- (1) The operational area differs depending on the user and the ways the transmitter is held.
 - (2) In certain areas, the operational area will be shortened due to the vehicle body shape and the influence of the surrounding environment.
 - (3) The transmitter's faint electric waves may be affected if the area has strong electric waves or noise. The transmitter's operational area may be shortened or the transmitter may not function.
 - (4) When the battery weakens, the operational area is reduced or the transmitter may not function.
- HINT:
If the door control transmitter has had prolonged exposure to direct sunlight, such as on the instrument panel, it may cause the battery to weaken or cause other such problems.
